

Assistant (Student)

Student Assistant for the Wireless Sensor Networks Lab SS22

The Wireless Sensor Networks lab offers the opportunity to develop software solutions for the wireless sensor networking system, targeting innovative applications. For the next semester, a position is available to assist the participants in learning the programming environment and during the project development phase. The lab is planned to be held on-site every Tuesday and Thursday from 15:00 to 17:00.

Prerequisites

- Solid knowledge in Wireless Communication: PHY, MAC, and network layers.
- Solid programming skills: C/C++.
- Linux knowledge.
- Experience with embedded systems and microcontroller programming knowledge is preferable.
