Assistant (Student)

Student Assistant for Wireless Sensor Networks Lab Winter Semester 24/25

The Wireless Sensor Networks lab offers the opportunity to develop software solutions for the wireless sensor networking system, targeting innovative applications. For the next semester, a position is available to assist the participants in learning the programming environment and during the project development phase. The lab is planned to be held on-site every Tuesday 15:00 to 17:00.

Prerequisites

- Solid knowledge in Wireless Communication: PHY, MAC, and network layers.
- Solid programming skills: C/C++.
- Linux knowledge.
- Experience with embedded systems and microcontroller programming knowledge is preferable.
