

Master's Thesis

Explicit Construction of Deterministic Identification Codes

In this thesis, the student after studying deterministic identification will construct the explicit codes for certain channels.

Prerequisites

Interested student are encouraged to contact me and send me a **CV** as well as all the academic **transcripts** and **relevant courses** that they have attended.

As well familiarity with the following is required:

Background in **Information Theory** and **Channel Coding**

Familiarity in fundamentals of **Identification Theory**

Advisors

Mohammad Salariseddigh
