Assistant (Student)

Student Tutor 1 for Image and video compression Lab SS2019

We are looking for tutor for image and video compression (IVC) lab in summer semester 2019.

About us

Research of the Chair of Media Technology covers the broad area of multimedia and multimodal signal and information processing, multimedia communications, as well as 3D image analysis and synthesis.

Tasks

1) Help students with basics of MATLAB programming (e.g., matrix operations, data format, filtering, image processing, encoding).

2) Help students with background knowledge of image and video compression and codes debug during the lab sessions.

We offer

1) Payment according to the working hours and academic qualification.

2) Workload is approximately 5 hours per week from April 2019 till July 2019.

Application

Please send your application with a CV and transcript of records per email to **kai.cui@tum.de** or **martin.oelsch@tum.de**.

Prerequisites

1) MATLAB experience required, especially image and video processing related experiences.

2) Solid background knowledge in image and video compression.
